

Care, attention, and a little paint can really make all the difference!

BASSMA works to renovate the rundown homes of deprived families throughout the year: re-building basic infrastructure, painting, cleaning, and especially making sure that the homes are healthy places for families to live in. This is a recent addition to our rehabilitation program, and an important component to the security of a family. In order to be rehabilitated, families need to be in a safe and healthy environment where basic needs are provided.
